

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

#### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

#### **About Google Book Search**

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

#### F. BACHELDER, HORSE

23 Sutton Street, Lynn, Mass. Agent for Clark's Patent Shoe.

For Corns, Bruses and Contracted Feet, CLARK'S PATENT SHOE is unsurpassed. The steel plate which covers the whole surface of the foot is far superior to the common way of using leather, as it retains the packing of tar and oakum, which subdues inflammation, protecting it from the gravel and dirt, and by pressing on the frog it causes the foot to expand to its natural shape.

### THE "HUB" WRAPS @ DRAWERS,

(Pat. Aug. 8, 1881,)

Have many superior advantages over all others. It has the PATENTED SUSPENSORY GORE, which prevents chafing, and removes all disagreeable points, such as seams, extra cloth, and tightening over the knee; it removes the unpleasant feeling experienced in all others, both foreign and domestic, and are indispensable for large men that appreciate comfort. Also, the wrap opening in front gives it a superiority of adjustment; as it fits loosely, it remains in position and is not so oppressive in warm weather as the light weights of merino fabric (and for winter wear has a chest protector attached which prevents colds, neuralgia, exterrh, pneumonia, etc.).

#### FRANK PEIRCE,

Sole Agent for

# "SHULTZ'S" RAW-HIDE BELTING,

LACE AND PICKER LEATHER,

128 Pearl Street - - - BOSTON, MASS.

For Race, Mule, Stripper, Card, Counter, Speeder, Cone, Winder and Driving Belts, in fact, for HARD PLACES it is acknowledged to be the BEST in use.

This Belting is tanned only on the Surfaces, retaining all the strength of the Raw Hide, and by a new Patented Process of Filling, is made perfectly pliable. It does not get hard; it does not tear out at the lace-holes or rivets; it stretches less than any other belt; it hugs the pulicy better, and displaces one third more power than any other belt. There is no acid, skall, salt or astringent used in its manufacture,—the process is entirely mechanical. In competitive tests with all the leading Oak-Tanned Belts, it has severed them with only one half their width. The Lace-leather is made of Raw Hide, without any Tanning, and is stronger and will wear longer than any other Lace-leather in the market.

#### THE FOLLOWING WELL-KNOWN MANUFACTURERS HAVE THIS BELTING IN USE.
